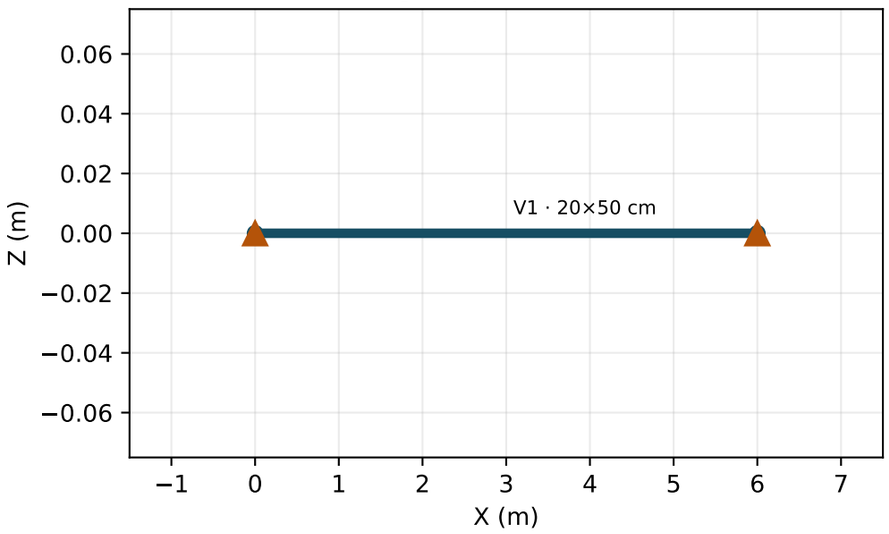
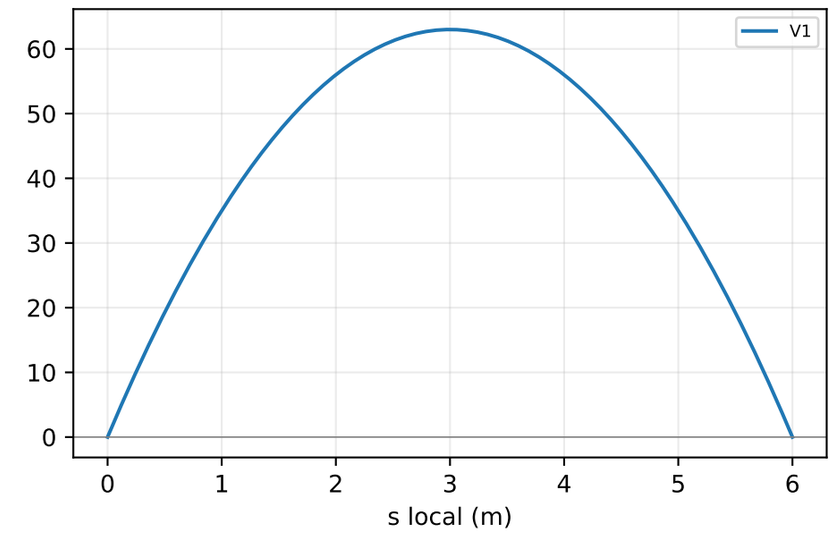
Ensaios lineares didáticos · esforços ELU_TESTE · NÃO É PROJETO EXECUTIVO
Linhas: referência Python; pontos de deslocamento: Java. Cargas e apoios no arquivo de casos.

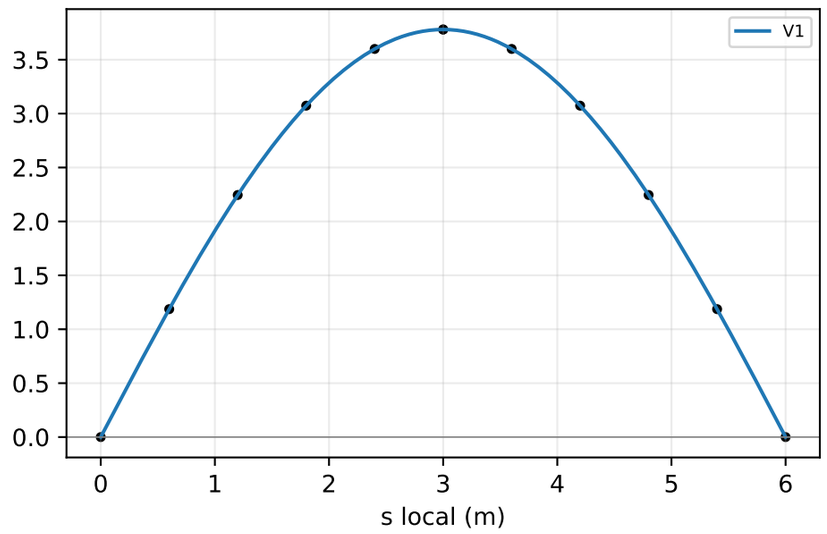
Viga biapoiada — 6 m



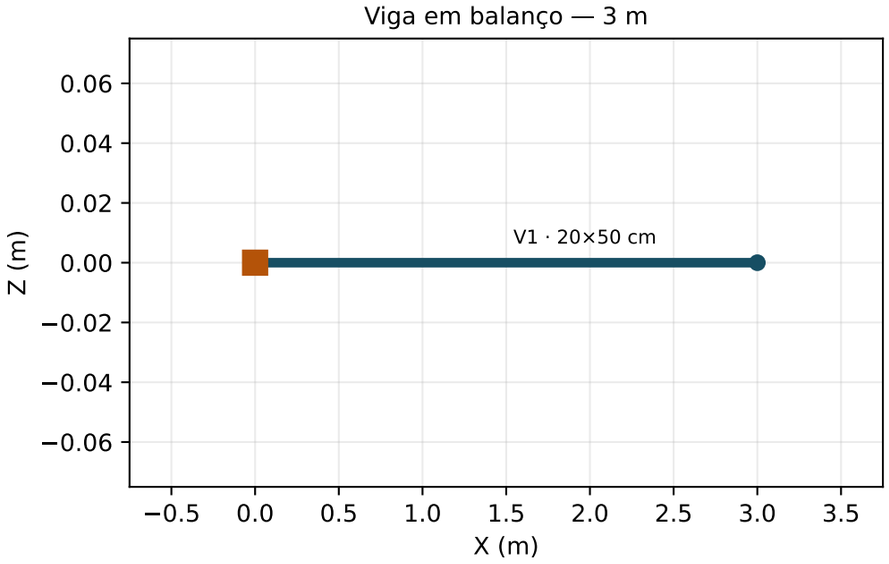
Momento local · referência (kN·m)



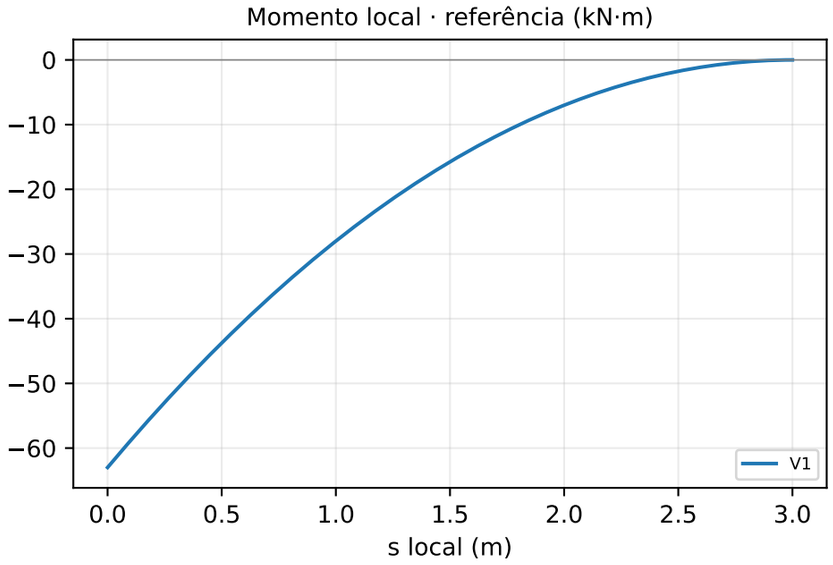
Deslocamento transversal linear (mm)



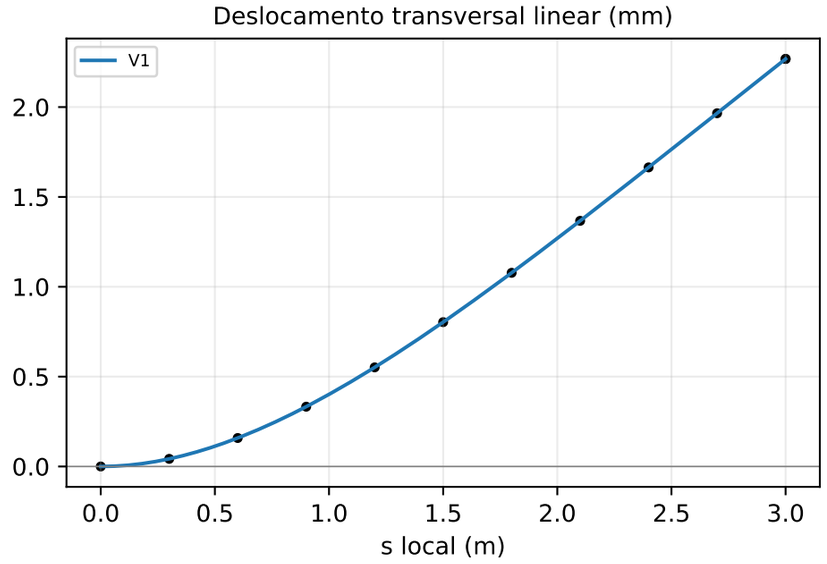
Viga em balanço — 3 m



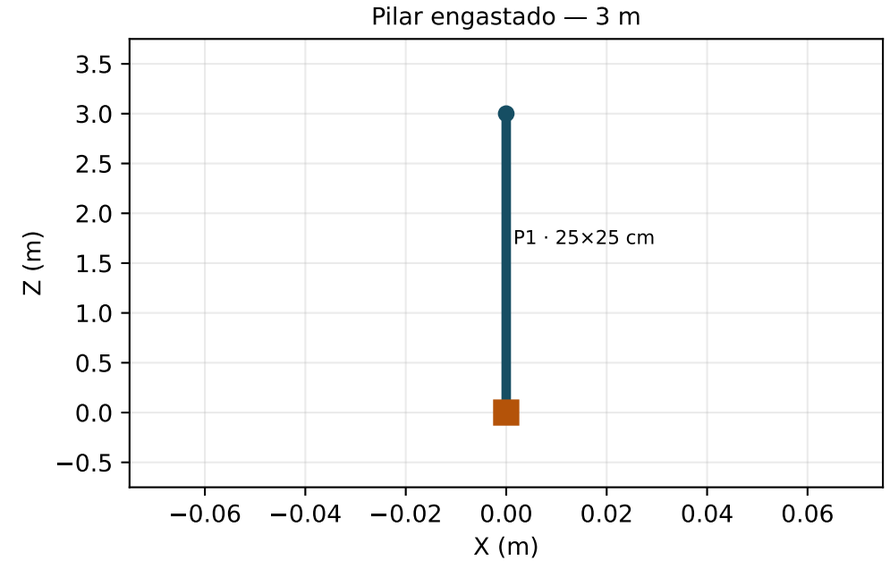
Momento local · referência (kN·m)



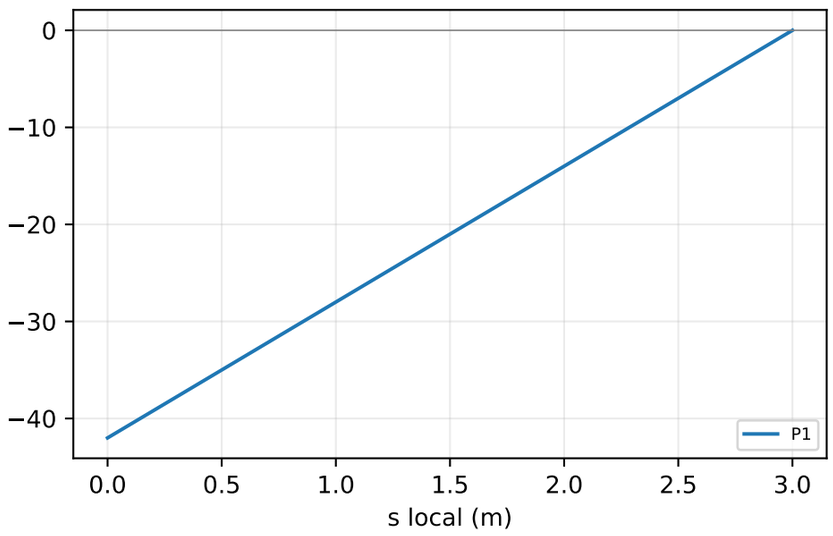
Deslocamento transversal linear (mm)



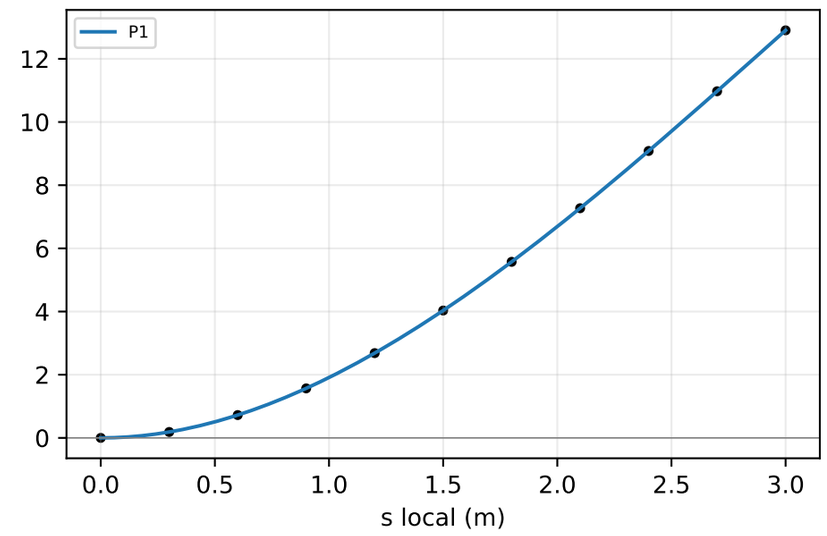
Pilar engastado — 3 m



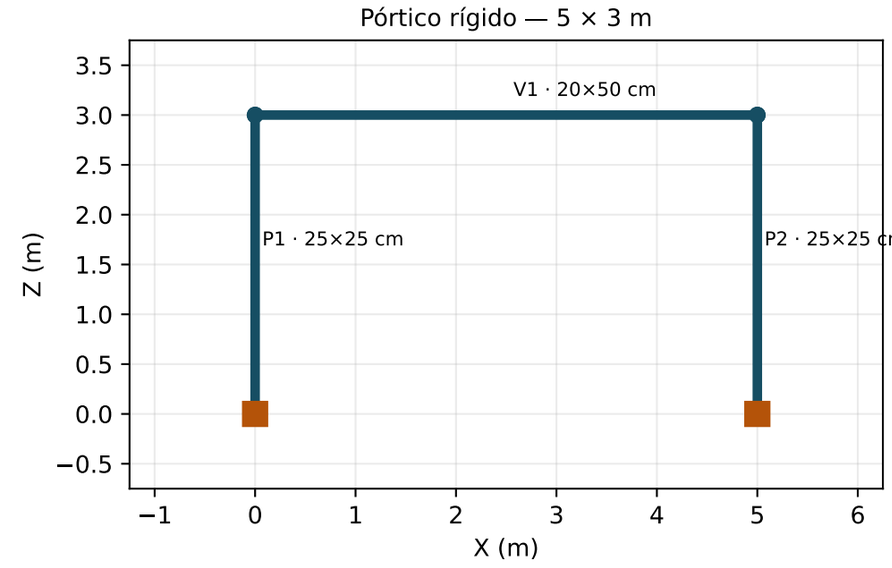
Momento local · referência (kN·m)



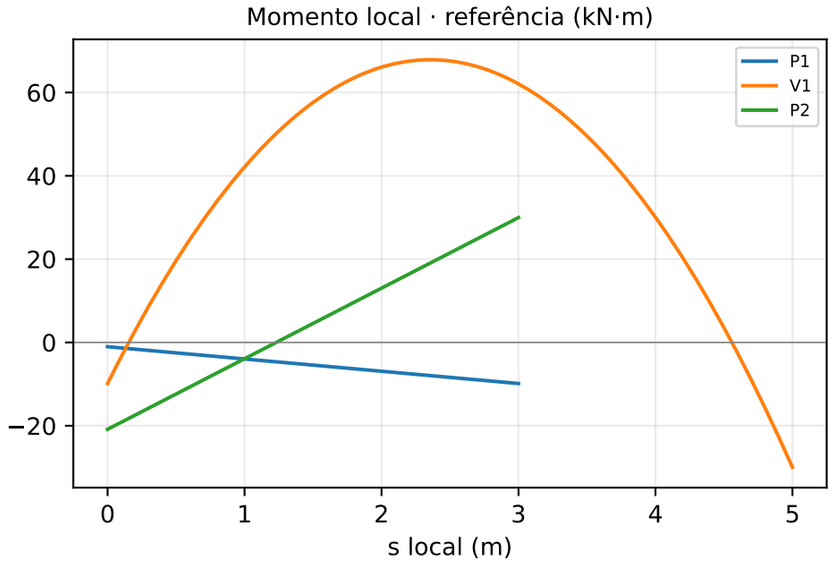
Deslocamento transversal linear (mm)



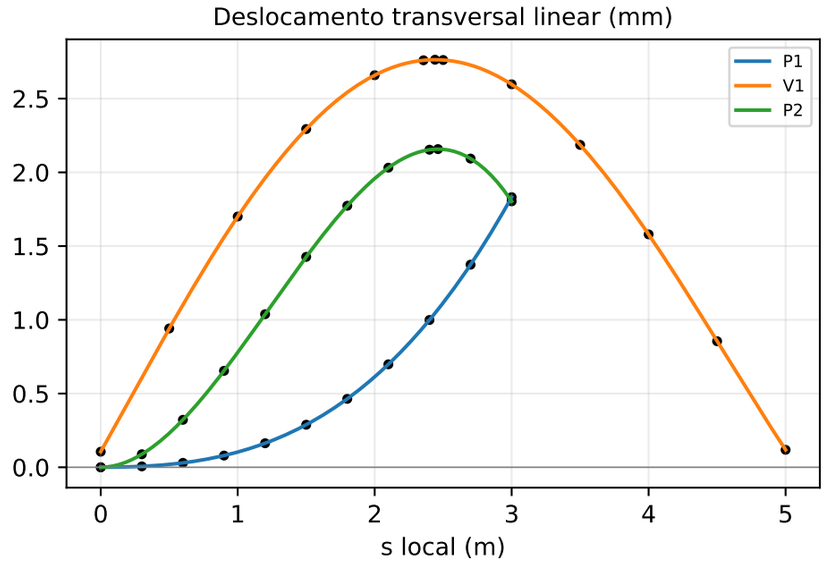
Pórtico rígido — 5 × 3 m



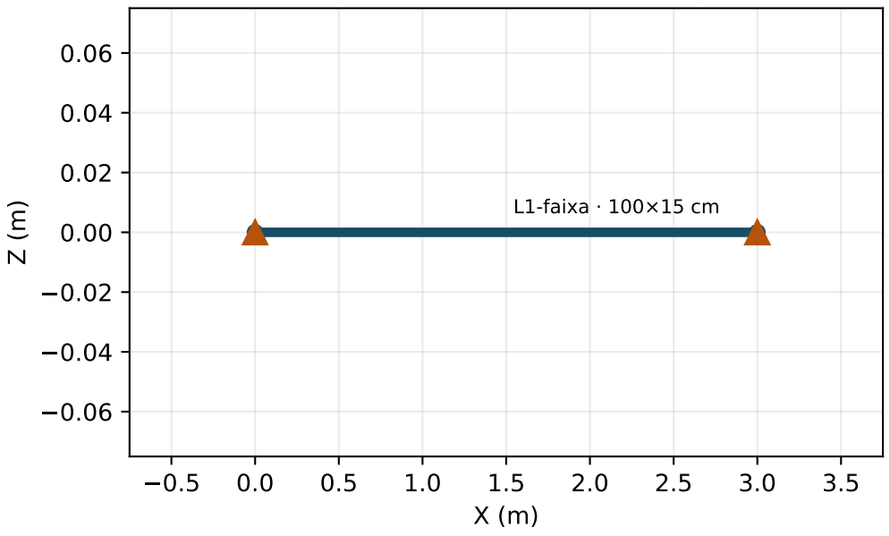
Momento local · referência (kN·m)



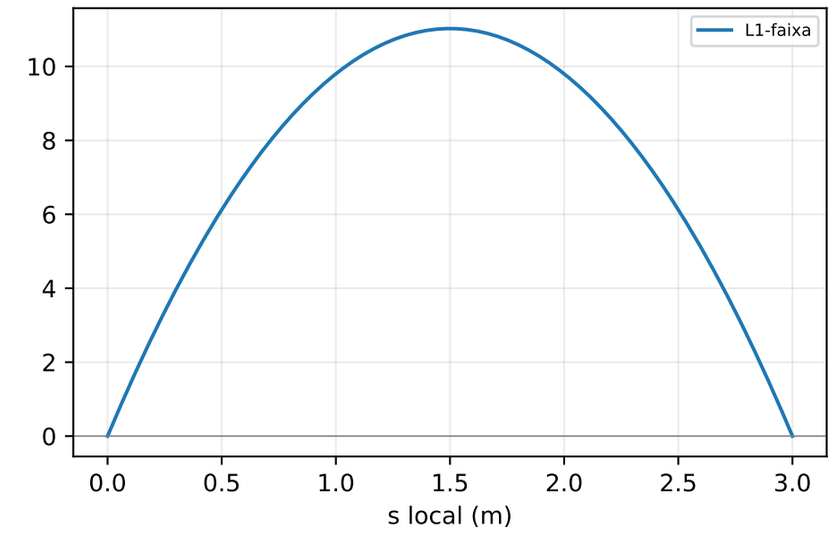
Deslocamento transversal linear (mm)

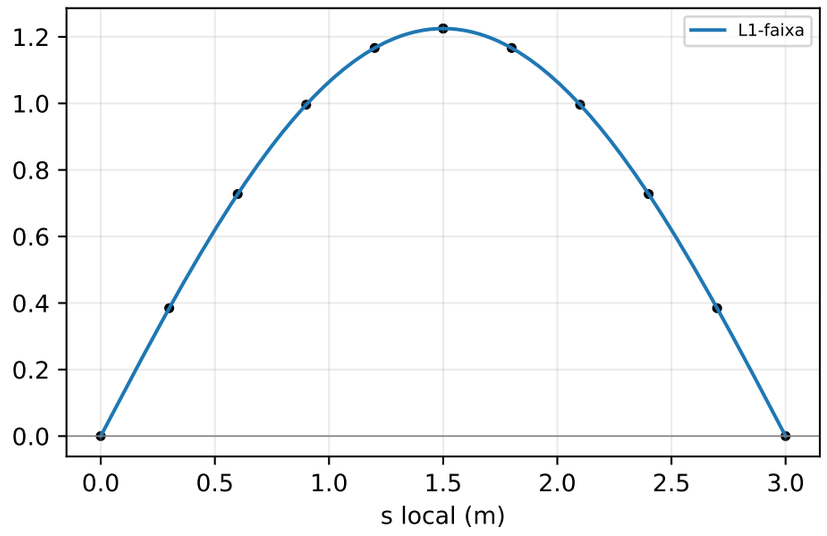


Faixa de laje unidirecional — vão 3 m, largura 1 m



Momento local · referência (kN·m)





Deslocamento transversal linear (mm)
